MUHAMMAD FAIQ ZHARFAN JOHARI

SENIOR WORDPRESS / PHP DEVELOPER | WEBSITE OPERATIONS

Kuala Lumpur, Malaysia | +60 19-636 9900
muhammadfaiqzharfan.johari@gmail.com
LinkedIn: muhammadfaiqzharfanjohari1997 | Portfolio: mokinho.github.io/

PROFESSIONAL SUMMARY

WordPress / PHP developer with 6+ years of experience across web development and digital operations. Manage a portfolio of 40+ websites, combining custom development with hosting, migrations, security, performance and technical SEO. Translate Figma designs into responsive websites and connect business platforms through APIs and third-party integrations. Build interactive browser experiences with Three.js and Phaser, and use AI assistants to support development with review and testing before deployment.

CORE TECHNICAL SKILLS

Development: PHP, MySQL, JavaScript, HTML5, CSS3/Sass, WordPress, WooCommerce, custom themes/plugins, ACF, custom post types, taxonomies, API integrations
Front end: Responsive development, cross-browser compatibility, modular JavaScript, Three.js, WebGL, Phaser, animation, keyboard/touch interactions, accessibility-aware UI, Figma, Elementor, WPBakery
Operations: Cloudways, cPanel, Plesk, LAMP, Cloudflare, DNS, SSL, SMTP, staging, migrations, backups
Optimisation: Website performance, technical SEO, canonical URLs, redirects, schema, sitemaps, robots.txt, Google Search Console
Tools and platforms: Git, GitHub, GA4, Google Tag Manager, Drupal, Shopify (intermediate), Claude, ChatGPT

PROFESSIONAL EXPERIENCE

Senior Web Developer | Sterrific

Feb 2025 - Present

- Develop, manage and maintain 40+ production websites, covering custom WordPress development, technical operations and ongoing support.
- Build responsive websites and dynamic features using PHP, ACF, custom post types and WooCommerce; translate Figma designs into production interfaces.
- Developed Yokohama Tyre Malaysia's WooCommerce tyre finder with product attribute mapping and 139 indexable filter landing pages, including clean URLs, unique content, metadata and self-referencing canonicals.
- Built a reusable template supporting 113 Yokohama dealer/store pages and handled staging-to-live migration.
- Rebuilt 3D Resources from static HTML into WordPress and customised Drupal programme-page code and templates for University of Southampton Malaysia.
- Delivered a revamp programme covering 40+ websites within four months, coordinating concurrent technical priorities and delivery timelines.
- Improved site speed by 35% through performance optimisation and delivered website migrations with no recorded migration downtime.
- Increased WooCommerce conversion rate by 25% through a custom Figma-to-WordPress implementation and tailored payment, shipping and e-commerce functionality.
- Manage hosting, DNS, SSL, SMTP and deployments; resolve malware, plugin conflicts, form delivery failures and integration issues.
- Implement technical SEO and analytics, and use AI assistants for debugging, development and documentation with validation before release.

PROFESSIONAL EXPERIENCE, CONTINUED

Web Developer | MacGad Technology Sdn Bhd

Apr 2024 - Jan 2025

- Delivered production websites for Revor Mattress, MUVATA Auto Parts and Hyperack using WordPress, WPBakery, Elementor, HTML and CSS.
- Improved website performance by 30% through front-end optimisation, page structure and usability improvements.
- Built custom landing-page elements and implemented on-page SEO and Google Ads tracking for a financing-sector client.

Assistant Chief Information Technology | Yayasan Pasir Gudang

Dec 2020 - Apr 2024

- Developed and maintained the organisation's custom WordPress platform using PHP, MySQL, HTML and CSS, supporting ongoing digital operations.
- Increased social media engagement by 50% through digital campaigns and improved organic search visibility through on-page SEO and technical page optimisation.

Junior Programmer | Nestle

Feb 2020 - Aug 2020

- Built the first paperless e-form system for two Nestle factories using PowerApps, Power BI and SharePoint.
- Supported structured process improvement using DMAIC methodology and earned White Belt certification.

SELECTED INTERACTIVE & WEB PROJECTS

Interactive 3D Drive-Thru Portfolio

2026 | HTML, CSS, JavaScript, Three.js

Built a modular JavaScript / Three.js portfolio with a navigable 3D world, following camera, collision handling, proximity-based content panels, audio feedback and keyboard/touch controls. Deployed on GitHub Pages.

mokinho.github.io/faiqzharfan/

Portfolio Quest | 2D Platformer

JavaScript, Phaser, Web Audio

Developed a browser-based portfolio using Phaser, multiple game scenes, Arcade Physics, touch controls, audio controls and a classic resume viewing option.

mokinho.github.io/2D-Super-Mario-Portfolio/

MokPixel | Creative Design Studio Website

Personal web project

Built project filtering, image lightboxes, scroll animations and validated WhatsApp/email enquiry flows, with reduced-motion handling, ARIA states and keyboard interactions.
